RE: 2025 Watermain Relining – 28 Street East (2-3 Avenue)

The City of Prince Albert Public Works Department would like to advise businesses and residents that 28th Street East (2-3 Avenue) is scheduled for a Capital Utility Project during the 2025 Construction season.

Project Details:

The scope of the project includes the relining of 168 meters of 150mm diameter Cast Iron Watermain (1973) with a structural liner, bringing the main to a like new condition without the need to excavate the roadway along the entirety of the pipe length. The project will take approximately 1 month to complete, and it is anticipated that two-way traffic will be available on 28th Street East throughout the entirety of the project. No driveways or private crossings are expected to be affected during the project. Above ground water will be provided to all property owners at times when water cannot be provided through the watermain.

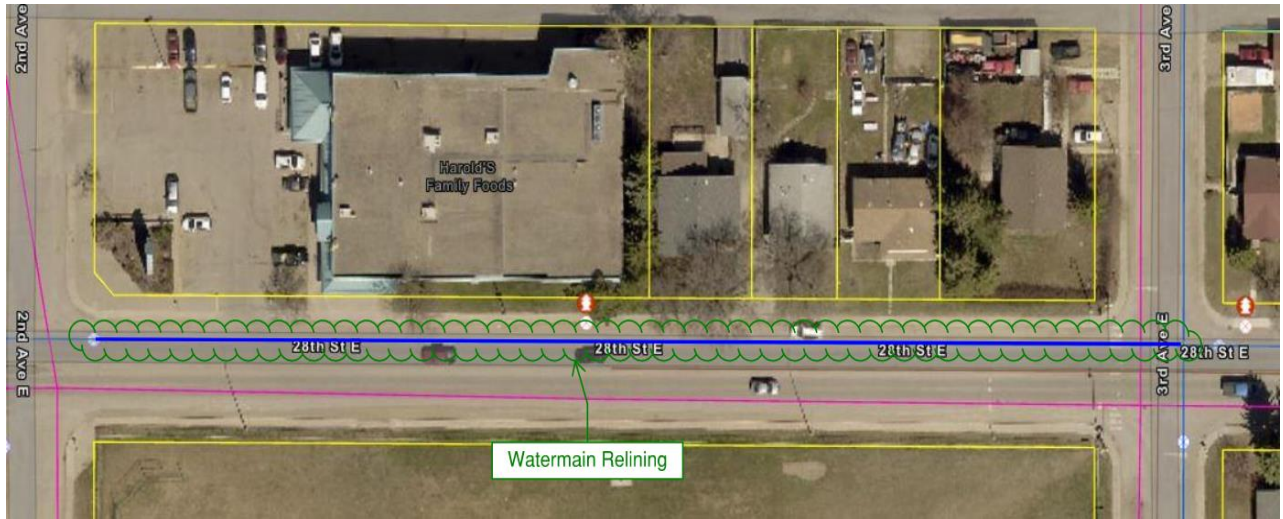

Upon completion of the watermain relining on the street, any asphalt, concrete and landscaping repairs will be completed promptly by the City.

A follow up letter will be provided two weeks prior to construction to provide additional details on the project, scheduling and construction zones. For a list of projects identified for paving and utility replacements, please visit <https://www.citypa.ca/en/parking-streets-and-transportation/capital-projects.aspx>.

If you require further information with respect to this matter, please do not hesitate to contact Public Works at (306) 953-4884.

Yours truly,

Evan Hastings, B.Sc., C.E., EIT
Capital Projects Manager
